Acoustic *solutions*

From bespoke solutions to ready made products.

Sven Erni and Jeffrey Ibañez, *Founders*

Following decades of success in architecture and interior design in Asia and Europe, our passion for design and innovation established a new era in acoustic solutions. Here, design meets sustainable development goals.

We are *innovation rebels*: permanent beta.

Driven by a strong belief that people and the planet can thrive at the same, we create beautiful, yet functional acoustic solutions designed to improve the lives of all of us without compromising the planet – permanent beta.

Every one of us has a responsibility to drive change, to make an impact. But making sustainable choices can be hard. We get that. Contributing to a better you and a better planet can happen in several ways, such as making conscious choices and opting for sustainable initiatives. We help you do that.

At IMPACT ACOUSTIC, we specialize in turning single-use materials into high-quality finished products that support design practitioners beat acoustic challenges. Naturally, our products are not the only solution in the war against single-use plastic. We reuse just about 16 minutes of the annual consumption of plastic bottles.

Yet, one step in the right direction is better than no step. That's why we spare no effort always to think one step ahead so you can feel like you're making an impact, too.

Now, go explore the collection of acoustic solutions and pick your favourite. We support you with custom requests and specialize in bespoke solutions. Thanks to a network of creative application engineers, product designers, and architects, we translate your ideas into a tangible product.

2 founders

28 colours

created for our unique ARCHISONIC® material. Each with a story to tell.

8 colour families

includes our unique color palette: Quiet Neutrals, Warm Naturals, Living Greens, Elemental Blues, Soothing Pastels, Elegant Darks, Energetic Brights, Primary Play

2019 founding year

100 % social

Products of IMPACT ACOUSTIC® prove to be a great tool for companies that take corporate social responsibility seriously.

20 millions

PET bottles are recycled annually and used for manufacturing of our products.

Our *Services*: from consulting to digital manufacturing

1 *Acoustic advisory*

Seeking to optimise acoustic comfort and improve the well-being of teams, acoustic elements must have the right performance and naturally support your design vision—whether classic or modern, bold or subtle. In short, we help you solve acoustic challenges while accommodating your design goals and budget.

2 *Planning and nesting optimisation*

Often, efficient material planning receives little to no attention in the design phase. The result is loads of cut-offs that are of no use, increased costs, and environmental damage. That ends here. We help you minimise material waste for your projects thanks to specialized tools and custom cutting plans.

3 *Parametric design*

We don't draw but program your unique ideas, and we do so by combining deep expertise in the field of computational-aided design, digital manufacturing, and a profound understanding of craftsmanship and materials. This approach delivers remarkable and sophisticated designs that perfectly meet your requirements – from ideas to budget.

4 *Prototyping and manufacturing*

Looking to turn your prototype into a tangible, working product? We help companies, across industries, and can support you, too. With a fusion of the latest technology, high-precision cutting centres, experienced product designers and application engineers, we have got you covered. So, skip delays, and get IMPACT ACOUSTIC involved at the beginning to accelerate the process of your new design project.

5 *Light calculation*

Similar to acoustics, lighting impacts our cognitive performance and problem-solving abilities. That is why we have brought together the best lighting technology with the best acoustic products, so you can perform at your best. We support you during any project from planning to lighting calculations to ensure you achieve the right luminance and acoustic performance.

Pioneering the war against single-use plastic

The *foundation* of our products

Dematerialisation, recycling, upcycling, and life cycle management are the foundation of our products and services. Our next big step is to develop products from our production waste through circular design principles. All our products are Cradle to Cradle Certified, and LEED v4 accredited.

In the fight against the use of single-use plastics, we support the global Trash Hero movement with a financial fund, organization and participation in their clean-up events.

Social engagement

We work closely with professionals with disabilities and develop solutions that we use in our products. Get in touch with us to find out more about our ecological and social initiatives.

Acoustic *Ceilings*

Transform your ceiling into a soundproofing piece of art with acoustic ceiling designs. Our standard and bespoke solutions help you beat acoustic challenges in a creative and effective way, ultimately improving the acoustic comfort and well-being of teams. Let's talk about your unique design ideas.

Our services

Bespoke Parametric Ceiling Baffles

Project

HQ Zurich Airport Ltd.

From conception to realization, our design team uses algorithmic-based processes that deliver unique and sophisticated acoustic designs perfectly tailored to your requirements and budget.

Bespoke Parametric Ceiling Baffles

Straight

A simple and timeless design that works in almost any space. The round edges add a soft feel and an element of surprise to rather rigid lines, while the perfectly engineered gaps between the baffles grant building services easy access when required.

Wave

Conceived based on the laws of nature and a complex algorithm, this peaceful design mirrors elements to create repetitive shapes that resemble the waves of the ocean. Bring a piece of nature inside to enhance corridors or conference rooms.

Peak

Edge

Combining simple geometric shapes has resulted in this intricate, powerful acoustic structure that's a real eye-catcher whether placed in long passageways or as a centerpiece in boardrooms or open space offices.

Nebula

This unique baffle system, designed by algorithms, combines two-sized elements to create a cloud-like pattern that not only excels acoustically but contributes to visually elevating any space, too.

Wave Ripple Bespoke

Wave Morph Bespoke

This peaceful ceiling design mirrors elements to create repetitive shapes that resemble the waves of the ocean. Easily customize this acoustic structure to bring a piece of nature inside to enhance corridors or conference rooms.

Wave Sine Bespoke

Edge Bespoke

Combining simple geometric shapes has resulted in this intricate, powerful acoustic structure that offers endless possibilities for customisation. Place it in long corridors or as a centerpiece in boardrooms or open spaces. No doubt, it will catch the eyes of anyone passing by.

Vela

Rectangle

Perfectly rounded corners, outfitted with a subtle trim, turn simple rectangular-shaped elements into beautiful ceiling canopies that can be adapted and combined in countless ways.

Rectangle Web

Square

These panels are ideal for improving room acoustics and can instantly inject new life into a low-budget project.

Rectangle Bubbles

Round

Stone

Round Web

Forest

Bring the outdoors closer with a series of acoustic elements, resembling the tree canopies found in the woods. The perforations contribute authenticity to the design, and when caught by the right light, playful shadows appear similar to what happens in nature.

Round Bubbles

Acoustic *Lighting*

Acoustic comfort and proper lighting are some of the most important aspects of a team's health and well-being. That is why we have brought together the best lighting technologies, developed with the Austrian market leaders PROLICHT, and the best acoustic products, so you can perform at your best.

Lighting in the workplace impacts performance. It influences cognitive performance and problem-solving abilities and can also improve our mood and interpersonal relationships at work, resulting in better job satisfaction: happy employee, happy company.

We offer the best performance of any linear workplace lighting fully integrated into our acoustic lighting panels. Our latest innovation presents a revolutionary low-glare technology to create bright ceilings without noticing the source of light. Simply beautiful!

Our services
**Acoustic Lighting Focus and
Wall Coverings Vertigo**

Project
Toradex

This project is entirely driven by acoustic design and delicately balances hard surfaces and soft acoustic wall panels for an effective and cost-efficient result. The use of acoustic lighting and acoustic wall coverings give the space an elegant flair while keeping the fun and comfort.

Focus

Umbra

Our solution for conference rooms,
long meeting tables or buffets.

Umbra Round

Creating an impressive
atmosphere to any
room, thanks to five
different sizes.

Ora

Bysso

Spark

This collection revives the classic and timeless lampshade. Create a cosy and comfortable character in offices, hotels, bars or lounges while combining various sizes and colours together.

Decipio

Cire

Focus

The well-balanced geometric shapes bring a smooth structure to every professional environment.

Acoustic *Wall Panels*

Solving acoustic challenges in small and narrow spaces can be challenging with most of the floor occupied by other furniture. In such spaces, acoustic wall panels are an effective solution. We offer an extensive range of standard and bespoke products to spark your creativity and endless imagination – in both small and big spaces.

Our services

Acoustic Wall Coverings Vertigo

Project

Novo Nordisk at The Circle, Zurich Airport

Meet Vertigo, a highly effective, flexible and cost-effective acoustic solution. The vertical v-cut lines blend effortlessly into existing or newly designed spaces like here. Vertigo is designed to cover surface up to the last millimeter and can even be cut on-site to perfectly fit any wall measurements.

Vertigo

Hexagon

Geometrically shaped patterns withstand trends and seasons, and this hexagon silhouette is no different. The slightly chamfered edge makes combined elements appear jointless, creating an effortless look. Combine contrasting or complementary colours to fit specific moods or styles.

Fylo

A sophisticated character that combines two panels with different thicknesses to give a plain wall a dynamic and contemporary feel. Mirror the elements to go from classy to fun and vice versa to fit various spaces and moods.

For *creative* minds
Our acoustic panels can also be used as pin boards. The soft and flexible material ensures brainstorming sessions in any meeting room and lets your creativity flow.

Acoustic *Room Dividers*

Create different areas in bigger spaces with acoustic partition walls and optimise the sound while you're at it. Pick your favourite from a wide product range. Every element can be adapted to fit your needs to become part of your design vision.

Our services

Acoustic Room Dividers Kyvos

Project

EY Lucerne

Acoustic room dividers offer world-class versatility in office spaces, hospitality, and learning environments.

Opt for a desk partition to create acoustic privacy at workstations. Create shelter between desks with hanging partitions as done here or go fully flexible with standing dividers that give you the freedom to create and recreate spaces.

Kyvos

What first appears like simple irregular lines gradually turn into complex geometric silhouettes.

The result is a striking and surprising design that delights the eye while providing excellent sound-absorbing features.

Bubbles

Circular-shaped bubble perforations, created by computational-aided design, beautifully spread across this sound-absorbing screen. Use it to define smaller areas in bigger spaces while optimizing visual and acoustic privacy.

Helios

While dividing spaces, this acoustic partition system does not entirely block the view. Instead, it creates a sociable visual barrier with floating same-sized circular acoustic panels that can easily be attached to any existing floor and ceiling structures.

Asto

Mobile Whiteboard Grafo

The magnetic writable enamel surface of our movable whiteboard solution allows a smooth writing experience, and the item can be hung using whiteboard magnets.

Paling

Murus Set

The individual wall elements can be simply attached together by metal connectors and can be adjusted or according to need with ease.

Motus

Thanks to high-quality steel trolley wheels with stoppers, the pinnable acoustic panels can be used exactly where they are needed. Perfect for classrooms or meeting spaces.

Soundproof *Chatpod*

Sometimes you need a razor focus or zero distractions. Take a step inside Chatpod, isolation pods for phone calls or small meetings. Chatpod is made in Switzerland of 97% post-consumer content such as recycled cardboard, PET bottles, sawdust, and rubber – all 100% recyclable.

Our services
Chatpod 300

Project
Swiss Health Insurer

Chatpod is the key to combining privacy, acoustic comfort and work in open spaces. The interior is soundproof while the exterior helps reduce echoes, background noise in the open office. It really works, and has been scientifically tested in cooperation with Lucerne University of Applied Sciences.

Chatpod 300

Chatpod 185

Compact telephone booth with space for one standing person.

Chatpod 350

Box for targeted conversations between two people (seated).

Chatpod 300

Concentrated work while sitting or standing thanks to height-adjustable table.

Chatpod 700 Bench

Flexible all-rounder for four people (sitting).

Chatpod 700 High Top

Flexible all-rounder for four people (standing) thanks to a high top table.

Chatpod 1200 High Top

Pod with plenty of space for meetings for up to six people (standing).

Chatpod 1200 Bench

Pod with plenty of space for meetings for up to six people (sitting).

Unique chatpod *benefits*

100% circular design: Sustainability is our game and we play it tough. Our phone booths and meeting boxes are made of upcycled materials which are 100% recyclable after end of life. Our entire facility is using green energy for all process steps from heating to production – in midst of our beautiful Swiss Alps.

100% social: Chatpod is a great tool for companies that take corporate social responsibility seriously. We value and promote equality within our organisation. Our products are produced and assembled in Switzerland in cooperation with a workshop for disabled people.

State-of-the-art soundproofing: We are experts in acoustic solutions. The Chatpod interior is soundproof, while the exterior helps reduce echoes, background noise and reverberations in the open office. As a „side effect“ it increases sound quality and wellbeing in your team.

Largest exterior colour range: The Chatpod acoustic exterior adapts to your office environment with a carefully curated colour palette of 28 colours. You can choose from any colour of our ARCHISONIC® collection, which was created with an understanding of developing and enduring colour trends and the stories behind them.

Did you know that you can also customize the frame colour? We offer a range of 30 shades to make sure the pod fits any interior. Do you want it to be a little more individual? The cuts in our acoustic cladding can also be made according to your needs.

Plug and play: Just plug in your Chatpod and it's ready to use with built-in power, lighting and ventilation system. For shipping we only separate the walls, top and bottom. All you need to do is to put the pre-assembled parts together, plug it in and start chatting.

Acoustic *Accessories*

A selected range of accessories for your everyday office life. Experience how the flexible and versatile material, which we produce from up-cycled PET bottles, is used to create tools that make your work easier and more pleasant.

Zurich

TwoWay

Cloak

TwoWay

The practical organiser for every desk. No open-plan office, home office or flexible workplace is complete without it. Made in cooperation with a sheltered workshop.

The *name* says it all

Use it in two ways: upright, it can be carried while lying down it can be used as a tray. Providing acoustic features to your desk during the day, while stored in a locker during the night.

StormBoard

Shelter

One collection *Eight* colour families *Unlimited* possibilities

This colour collection is created in partnership with Colour Hive with an understanding of developing and enduring colour trends, each with a story to tell.

ARCHISONIC®

A range of versatile neutrals and directional highlights

As individuals, our tastes and preferences are informed by a palette of influences, from the political and social climate to environmental concerns and technology advances.

We have taken these influences and translated them into a range of versatile neutrals and directional highlights. Each one plays a role in eight delicate stories designed to capture the prevailing moods in colour.

Psychology of colour

The state of your work environment can impact your experiences for better or worse, and colours especially play a critical role. Certain colours leave you uninspired, while others make you feel energetic, relaxed, or creative.

For example, yellow can boost confidence and energy in the workplace, while red stimulates and excites employees. Green and blue can create feelings of peace of mind and relaxation.

All our 28 colours and 8 colour families are matched with each other. Which one is your favourite?

Quiet Neutrals

In an ever-connected increasingly urban age, we are all at times in search of a moment of silence. With this in mind, we look to the quieter elements of nature as inspiration for a series of calming and balanced neutrals.

Acoustically *well-* *balanced spaces* to please the ears and mind

Products
Bespoke Ceiling Baffles

Location
Novo Nordisk, The Circle at Zurich Airport, Switzerland

With a magnificent view of the airfield at Zurich Airport, Novo Nordisk teams can enjoy a front-row seat to the air traffic during work. In addition to satisfying the eyes, the new office buildings at The Circle also provide employees with acoustically well-balanced spaces to please the ears and mind. Throughout the space, from recreation

rooms to cafeterias and individual workstations, a mix of graphically cut square and round acoustic panels suspend from the ceiling to reduce excess noise in the open-plan office. These cut-outs were achieved through a custom design to ensure air permeability – one of the requirements for installations in this new building.

Clear *design vision* and ensure consistency

surrounding environment**

Products

Bespoke Acoustic Wall Mural, Acoustic Room Dividers Linea

Location

EY Lucerne, Lucerne, Switzerland

As employees and visitors alike arrive at EY in Lucerne, they are welcomed by a beautiful mural picturing Mount Pilatus, the iconic mountain towering the city of Lucerne. This mural is like no other. It's a piece of art with acoustic features, created from dozens of small pieces of ARCHISONIC®. Commonly, details like these are extremely hard to create, but thanks to our high-precision cutting techniques, it is possible. Apart from the stunning mural, room dividers add additional acoustic treatment while perfectly balancing the need for visual privacy and connection with the surrounding environment.
